

DESCALERS

A Range of Acid Based Descalers for Commercial and Industrial Use

BENEFITS

- Full range of products to choose from
- Labour saving
- Improves efficiency of systems.

DESCRIPTION

A full range of products for descaling all types of substrates in many industries. WCF also supply a wide range of cleaning agents which also descale as part of their action - ask for technical data on 4 Way, 4 Way T, Cleanall, Derra and Aqueous System 8.

HSD EXTRA- HIGH STRENGTH DESCALER

A very powerful, fast acting descaler, based on Hydrochloric Acid. It also contains a careful blend of wetting agents to aid penetration and inhibitors to minimise metal attack. Its main uses are found in the plumbing industry where it is used to descale central heating systems. It is also very effective at removing cement and mortar stains from brickwork, tarmac, cement mixers and tools.

D.M.D- DELICATE METAL DESCALER

An organic based material with added wetting agents for use in descaling all types of metal, including aluminium, with no detrimental effects on the metal. It is a very fast acting product, even at its working dilution of 12:1. It can be used to descale heating systems (commercial & domestic), dehumidifiers, steam cleaners, cooling systems (e.g. plastic injection industry), kettles and anywhere containing delicate metals where Hydrochloric Acid descalers would be unsuitable.

LOW FOAM DESCALER

A blend of Phosphoric Acid and block co-polymer. It is safe for use on stainless steel. Its main uses are in commercial and domestic kitchens where it is used to descale dishwashers, kitchen equipment and utensils. It is also very effective at descaling urinals of ceramic and stainless steel.

CLIPCLEAR

A biodegradable, organic based descaler originally designed to slowly eat mortar stains from scaffolding clips without harming the metal or evolving harmful fumes. Its non-toxic formulation makes it an ideal choice for descaling coffee machines, vending machines, washing machines, etc.

DOMESTIC APPLIANCE DESCALER

Formic acid based descaler for the quick and efficient removal of scale from a variety of domestic appliances including kettles, steam irons, shower heads, coffee makers and more.

Simply add to water, leave for a few minutes before emptying and rinsing thoroughly. Results in clean, scale free appliances.

HEALTH & SAFETY

Obtain and read 'Material Safety Data Sheet' before use. Wear rubber gloves and eye/face protection when using. Do not mix any of these products with any other chemical. Do not add water to these products, for dilution purposes add the descaler to the water.

PACKAGING

500 ml
1 lt
5 lt
20 lt
