## FERRICON PRIMER

A complex mixture of a vinyl acrylic copolymer and tannic acid for the treatment of corroded steel and iron surfaces.

### BENEFITS

- Non-hazardous.
- Kills rust and halts further spreading.
- Leaves surface primed ready for painting.

### PRODUCT SIZES

- 1 Litre.
- 5 Litres.

### DESCRIPTION

A water-based rust converter.

Ferricon primer is a milky white latex coating that is applied to rusted metal to stop rust, protect the surface and act as a primer for the final coat.

It neutralises the corrosion process by converting the rust in to a blue-black metallo-organic complex which passivates the surface.

It then further protects the surface by forming a film with a low permeability to water vapour and oxygen.

### INSTRUCTIONS FOR USE

Wire brush loose rust and wash to remove soluble salts. Surface should be oil and grease free.

Can be sprayed or brushed (40 microns coat is considered optimum for brushing). 60 micron can be achieved by spraying.

Shake can well before use.

Can be applied on to a damp surface and will dry quickly.

Do not allow to freeze.

Use within 12 months.

## PHYSICAL PROPERTIES

**Colour:** Whiteish

**Appearance:** Viscous liquid.

**Odour:** Ethereal

**Solubility:** Completely miscible in water.

**Boiling point:** No data available.

**Flash point:** No data available.

**Flammability:** Not applicable.

**Density:** 1.23

**pH:** <2.5

## HEALTH & SAFETY

**Hazard pictogram (CLP):**

**Hazard statements (CLP):**

H319 – Causes serious eye irritation.

**Precautionary statements (CLP):**

P264 – Wash hands thoroughly after handling.

P280 – Wear eye protection, protective gloves.

P305+P351+P338 – IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do. Continue rinsing.

P337+P313 – If eye irritation persists: Get medical advice/attention.

P405 – Store locked up.

**Hazardous ingredients:** None.

**EUH210 – Safety Data Sheet available on request.**
