SPECIALITY CUTTING FLUID

A superb cutting, drilling and tapping fluid.

BENEFITS

- Prevents scoring, even on the toughest alloys.
- Lubricates and protects.
- Suitable for lubricating saw blades and other cutters.
- Reduces frictional heat.
- Suitable for severe applications.
- High performance.

PRODUCT SIZES

- 500ml aerosol.
- 500ml aerosol (Dozen).
- 5 litres

DESCRIPTION

Speciality Cutting Fluid is a blend of fatty esters and extreme pressure lubricants in severely solvent refined mineral oils.

It is used on cutting tools, broaches, taps, dies and other extreme pressure tools. Speciality Cutting Fluid reduces frictional heat and prevents scoring even when tapping the toughest alloys. Contains no lead graphite or minerals.

A very high-performance product for severe applications on heavy duty alloys, stainless and aerospace steels. Also recommended for titanium, nimonics, waspalloy and aluminium.

Comes in aerosol (spray) and liquid form. Wessex Speciality Cutting Fluid is a high-quality product that has been used in the engineering and construction industry for many years

INSTRUCTIONS FOR USE

Apply to tool or area to be tapped.

PHYSICAL PROPERTIES

Colour: Colourless.

Appearance: Liquid under pressure.
(Aerosol can).

Odour: Characteristic.

Solubility: No data available.

Boiling point: No data available.

Flash point: No data available.

Flammability: Extremely flammable aerosol.

Density: No data available.

pH: N/a.

HEALTH & SAFETY

Hazard pictograms (CLP):

Hazard statements (CLP):

H222 – Extremely flammable aerosol.

H229 – Pressurised container: May burst if heated.

Precautionary statements (CLP):

P102 – Keep out of reach of children.

P210 – Keep away from heat, hot surfaces, sparks, open flames and other ignition sources.
No smoking.

P251 – Do not pierce or burn, even after use.

P410+P412 – Protect from sunlight. Do not expose to temperatures exceeding 50°C.

Hazardous ingredients: None.

EUH210 – Safety Data Sheet available on request.
