

# WP 1105

## UNDERFLOOR HEATING PROTECTOR

Removes and prevents blockages within underfloor heating systems

### BENEFITS

- Effective biocide and fungicide
- Removes blockages caused by slimes
- Give long lasting protection to underfloor heating systems
- Safe on all materials found in underfloor heating systems
- Non-toxic, non-corrosive and safe to handle

### DESCRIPTION

Protects underfloor heating systems from potential problems caused by the development of bacteria and fungi. Low temperatures in underfloor heating systems promote the growth of bacteria and fungi that can cause blockages in pipework, heat exchangers and more. These growths can also cause unpleasant odours and corrode the heat exchanger. This can lead to severe disruption in underfloor heating systems and greatly effect performance levels.

### PHYSICAL PROPERTIES

Physical state: Liquid

Appearance: Clear, colourless liquid

Molecular mass: 34.01 g/mol

Colour: Colourless

Odour: Characteristic

Melting point: ~0°C

Boiling Point: ~100°C

Flammability (solid, gas): Non flammable

Relative vapour density at 20°C: >1

Density: 1.01 g/cm<sup>3</sup>

Solubility: Soluble in water

### INSTRUCTIONS FOR USE

Add 1 litre of Underfloor Heating Protector to most average systems and circulate for 30 minutes to ensure complete distribution and protection.

Larger systems should be dosed at a rate of 1 litre of Underfloor Heating Protector to every 300 litres of system volume.

Circulate around the system for approximately 4 hours at an ambient temperature. Then flush the system and refill with 1 litre of Underfloor Heating Protector for every 300 litres of water to prevent any reoccurrence.

Not to be mixed with any other product other than our Corrosion Inhibitor.

### HEALTH & SAFETY

Not classed as hazardous.

### PACKAGING

1lt
